

Peaceful Producer

Better marriages build better leaders. Better homes create better companies.

The Homefront Leadership Reset

A private 12-week coaching process for high-achieving married leaders who want more peace, trust, passion, and alignment at home.

This is not therapy. It is not crisis counseling. And it is not about fixing your spouse. It is leadership development applied to marriage. Over 12 weeks, we work together to identify the patterns creating stress at home, help you lead with more calm and ownership, build better communication tools, create practical agreements, and install a weekly rhythm for more peace and connection.
